BIN HAMID ENGINEERING CONSULTANT L.L.C

**Every landmark
begins with a vision.**

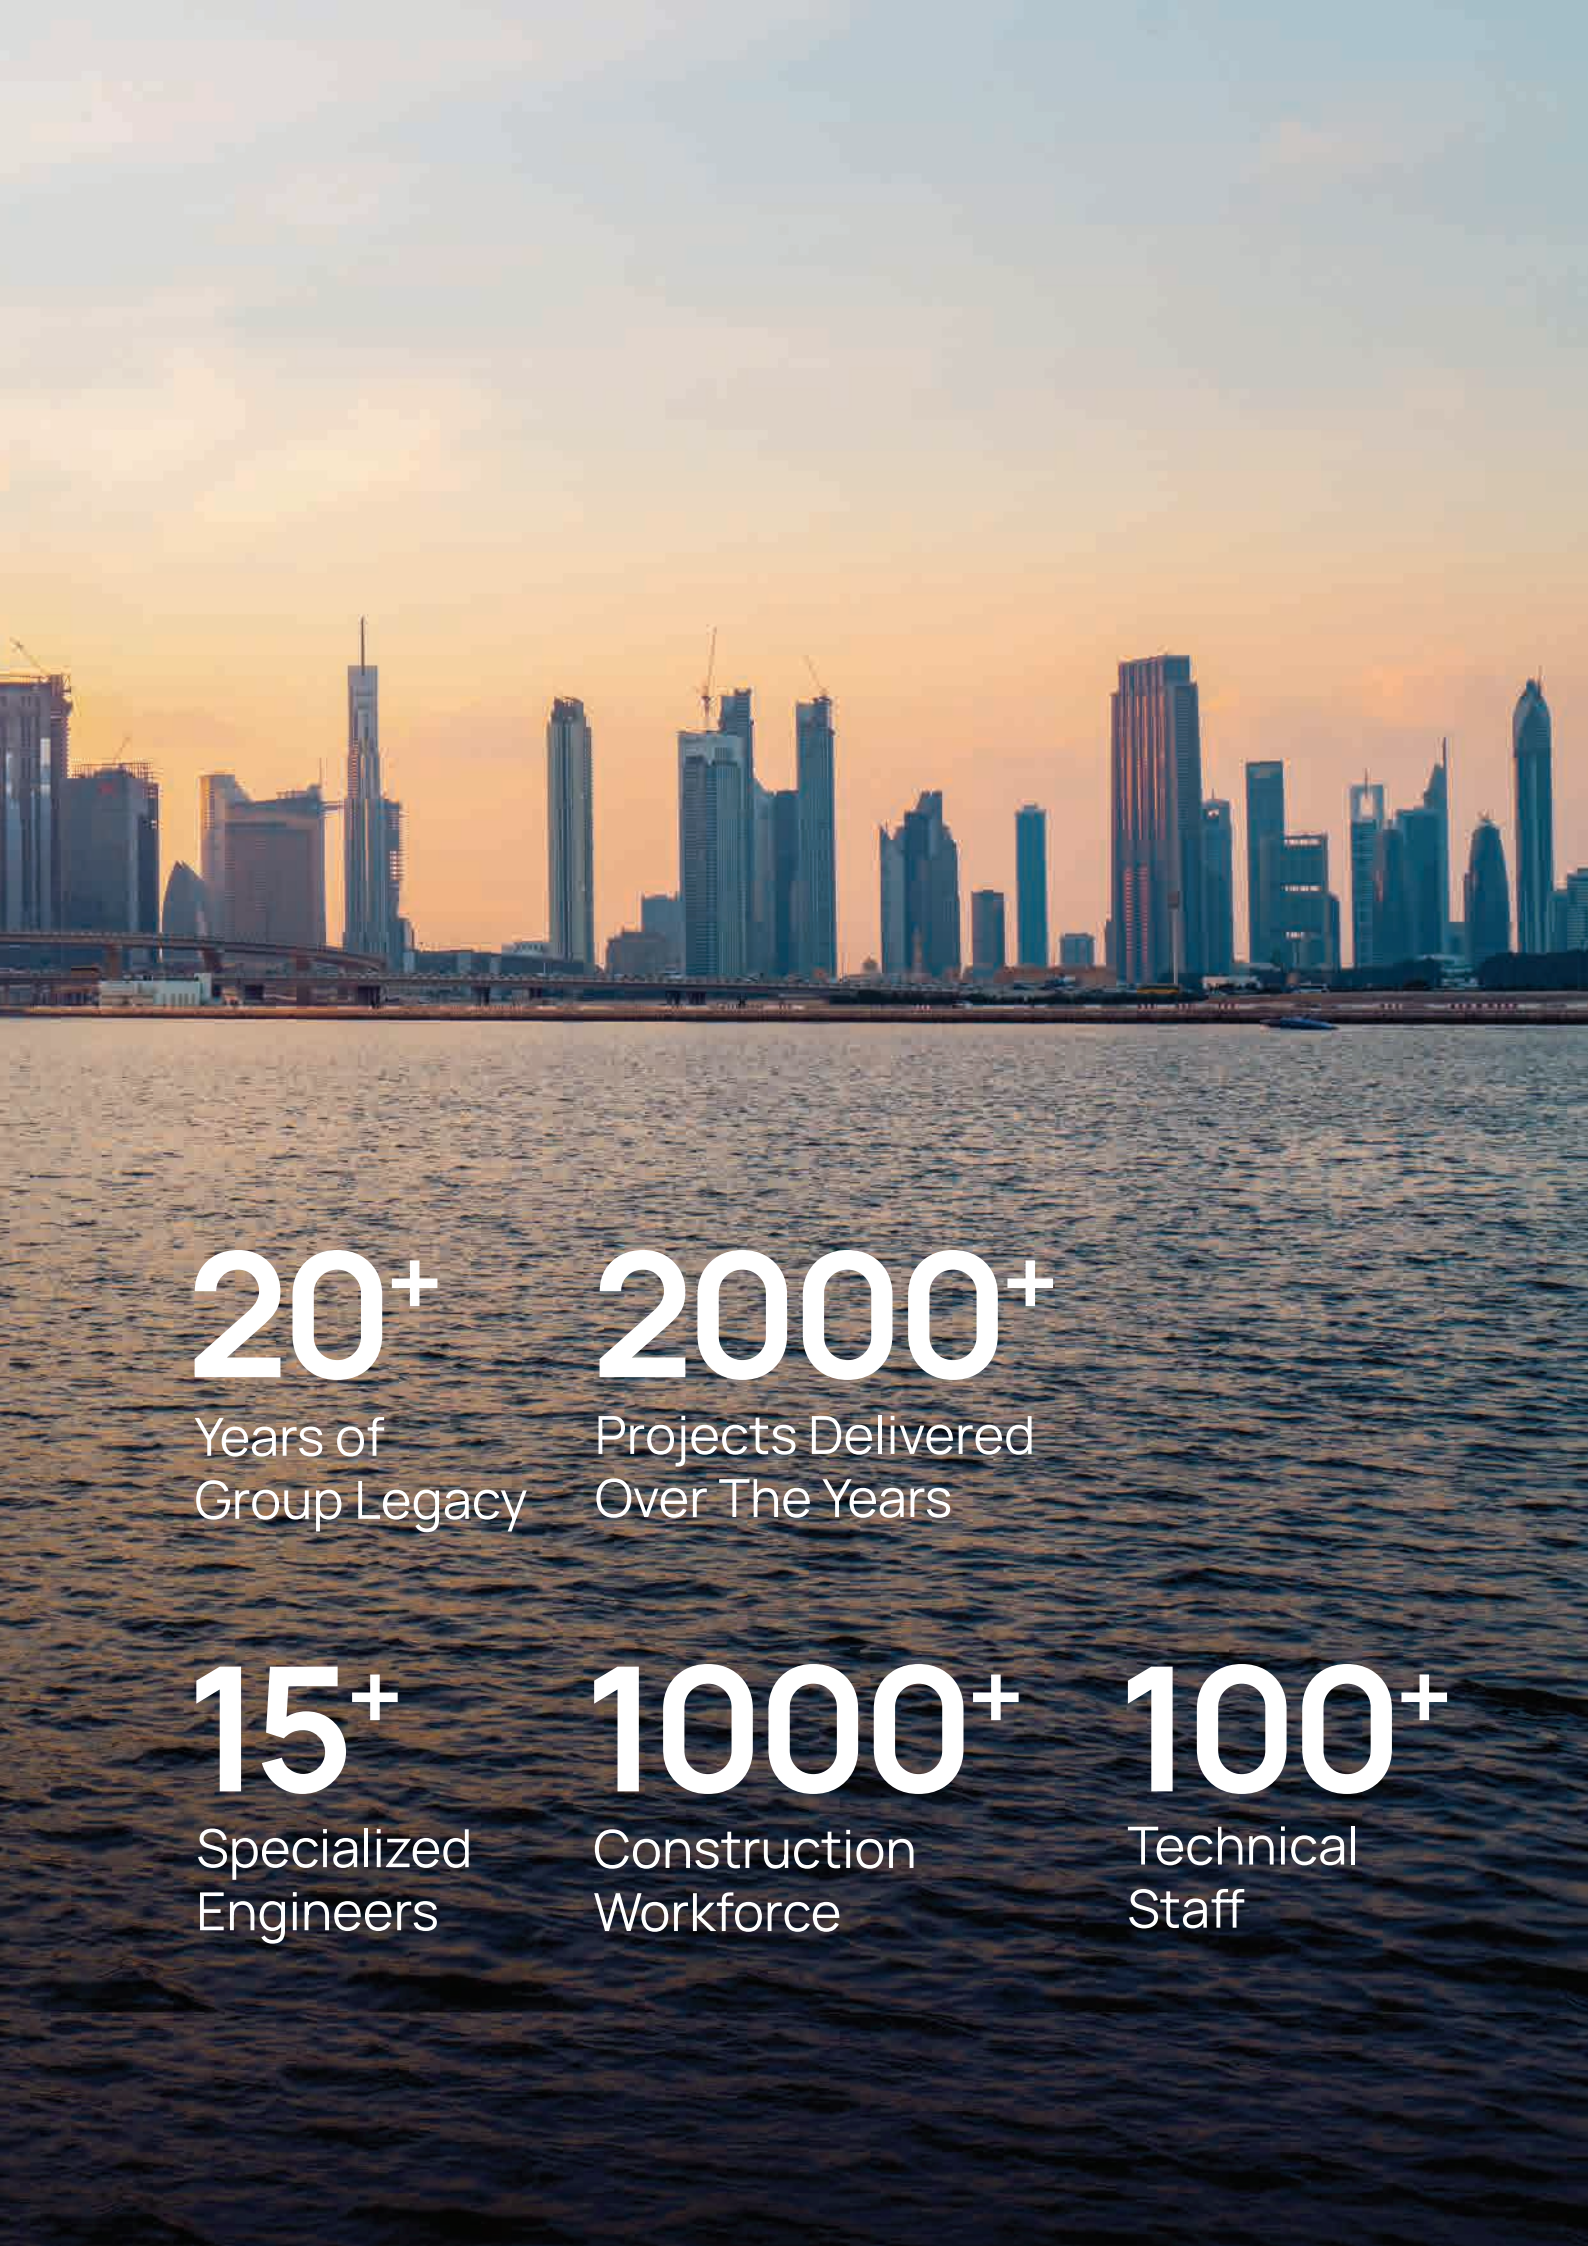

Curating all your construction design
and supervision needs, with passion

Every Successful Project Begins with **the Right Engineering Partner.**

From visionary concepts to completed structures, every successful project demands expertise, precision, and dependable execution. At Bin Hamid Engineering Consultant, we deliver integrated engineering consultancy and contracting solutions that simplify complex developments, ensuring every stage is managed with confidence, quality, and technical excellence.

A wide-angle photograph of the Dubai skyline at sunset. The sky is a mix of orange, yellow, and light blue. The water in the foreground is dark with gentle ripples. The skyline features several prominent skyscrapers, some with construction cranes on top, silhouetted against the bright sky.

COMPANY OVERVIEW

Tracing our evolution from a specialized Sharjah-based consulting practice into a premier, integrated engineering powerhouse serving the Fujairah region and beyond.

Bin Hamid Engineering Consultant is the Fujairah-based arm of Bait Al Khibrah Engineering Consultants, bringing over two decades of engineering, consulting, and contracting expertise to clients across the UAE.

We provide integrated solutions that seamlessly connect engineering design, authority approvals, construction supervision, and project execution under one trusted partner. By combining technical excellence with practical project management, we help clients navigate every stage of development with confidence.

Supported by experienced engineers, technical specialists, and a highly capable construction workforce, we are committed to delivering projects that meet the highest standards of quality, efficiency, and long-term value.

Mission

To deliver integrated engineering consulting and contracting solutions — from design and authority approvals to construction and handover — with uncompromising quality, cost efficiency, and on-time execution, so our clients can build with confidence.

Vision

To be the UAE's most trusted engineering consultancy and contracting partner — recognized for turnkey delivery, technical excellence, and a legacy built on 2,000+ successfully handed-over projects.

Quality

Precision in every drawing, every approval, every structure.

Integrity

Transparent dealings with clients and authorities alike.

Passion

We curate, not just execute.

Cost Discipline

Smart estimation and procurement that protects our clients' budgets.

Reliability

Backed by two decades of group experience since 2006.

Safety

Compliance-first culture across design, site, and supervision.

core values

A LEGACY IN MOTION

TRACING TWO DECADES OF ENGINEERING EVOLUTION AND GROWTH.

2006

Bait Al Khibrah Engineering Consultants founded in Sharjah, laying the foundation of the group's engineering and consulting practice.

2011

Founded Al Bawadi Building Contracting (Sharjah)

2012

Founded Rawaat Al Tasameem Building Contracting (in Sharjah)

2015

Bait Al Khibrah crosses the milestone of 500 successfully delivered projects.

The Bin Hamid story began in 2006 with the founding of Bait Al Khibrah Engineering Consultants in Sharjah, establishing the intellectual core of our group. We realized early on that a visionary design only reaches its potential when paired with masterful execution. To bridge this gap, the group strategically expanded by establishing sister contracting firms—Al Bawadi and Rawat Al Tasameem—ensuring our high engineering standards were mirrored on the construction site. This "Design-to-Build" methodology allowed us to maintain total quality control, and by 2015, our approach was validated as we crossed the milestone of 500 successfully delivered projects across the UAE.

In 2024, we reached a new frontier with the establishment of Bin Hamid Engineering Consultant in Fujairah. This localized powerhouse was designed to bring our decades of expertise to the ambitious developments of the Northern Emirates. Today, Bin Hamid stands as a titan of integrated construction, managing over 1,000 dedicated personnel and a brain trust of 15+ specialized engineers. Having surpassed 2,000+ handed-over projects, we now offer full turnkey execution for projects up to G+4. We operate with a rare level of independence, utilizing our own manpower and equipment to eliminate third-party dependencies and ensure on-time delivery.

2020

The group surpasses 1,500+ projects handed over – a defining milestone marking two decades of trusted delivery.

2024

Bin Hamid Engineering Consultant established in Fujairah, extending the group's reach across the Northern Emirates.

2025

Branched Rawaat Al Tasameem Building Contracting (in Fujairah)

Today

Bin Hamid operates with 15+ specialized consulting engineers, 100+ technicians, and 1,000+ manpower in contracting, supported by sister contracting companies Al Bawadi Building Contracting (Sharjah) and Rawaat Al Tasameem Building Contracting (Sharjah & Fujairah) – delivering turnkey projects up to G+4.

WHAT WE DO

Our consulting wing is the strategic engine of every project, ensuring that your vision is both architecturally stunning and structurally sound.

Consulting

- Design (Architectural, Structural, MEP)
- Authority Approvals
- Planning & Project Management
- Supervision

Contracting

- Estimation — with a focus on cost control and quality
- Procurement
- Construction
- Renovation
- MEP Fit-Outs
- Landscaping
- Interior Design

Handover

Turnkey handover — a single point of responsibility from concept to keys-in-hand.

STRUCTURAL EXPERTISE

From high-tensile steel to advanced concrete solutions, we deploy specialized engineering techniques to ensure lifelong structural integrity.

Post-Tension Structures

We specialize in post-tensioning techniques that allow for thinner concrete slabs and longer spans. This not only reduces material costs but provides architects with greater creative freedom for open-plan interiors.

Reinforced Concrete Structures

The backbone of modern construction. Our RC solutions are engineered for maximum load-bearing capacity and environmental resistance, utilizing high-grade materials and precision casting.

Steel Structures

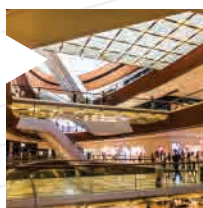

For projects requiring speed, versatility, and high strength-to-weight ratios, our steel engineering provides a robust alternative. We manage everything from complex trusses to large-scale industrial frames.

INDUSTRIES & SECTORS

Whether it is the intimacy of a private villa or the complexity of a commercial mall, we bring the same level of mastery to every vertical.

Shopping Malls

From expansive lifestyle hubs to modern community centers, we deliver large-scale landmarks designed to foster economic growth and provide a premium experience for visitors and businesses alike.

Commercial Buildings

Modern retail and office spaces designed for optimal human flow and maximum commercial viability.

Residential Villas

Bespoke luxury homes designed to become personal landmarks of comfort, privacy, and superior craftsmanship.

Landscaping

Sustainable, climate-ready exterior environments that enhance the harmony and beauty of every development.

Governmental Buildings

High-standard public infrastructure engineered for safety, functionality, and strict regulatory compliance.

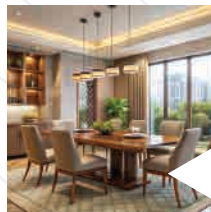

Mosques

Iconic sacred spaces that blend traditional Islamic aesthetics with advanced structural engineering and precision.

Commercial Units

Optimized retail shops and rental residential units designed for high efficiency and maximum investor returns.

Interior Design

(Retail shops + Residential units)

High-end, turnkey interior fit-outs that deliver a complete, ready-to-use lifestyle or business experience.

WHY CHOOSE BIN HAMID

01

Integrated Design & Build

We eliminate the friction between the consultant and the contractor. By managing the entire lifecycle—from the first sketch to the final brick—we ensure that the architectural vision is never lost in translation.

02

Authority Approval Expertise

Our deep-rooted relationships with UAE municipal bodies allow us to navigate the complex landscape of approvals and permits with unmatched speed, keeping your project timeline on track.

03

In-house Engineering Team

Our multidisciplinary brain trust of 15+ specialized engineers (Architectural, Structural, MEP) works in constant collaboration, ensuring that every design is technically flawless before construction begins.

04

Cost-efficient Planning

Through smart estimation and strategic procurement, we protect your budget. We optimize material usage and manpower without ever compromising on the structural integrity or safety of the building.

05

Quality-focused Execution

We maintain a "zero-compromise" policy on-site. Our dedicated supervisors ensure that every phase of construction meets international quality benchmarks and strictly adheres to approved blueprints.

06

Turnkey Project Management

We provide a single point of accountability. Our clients enjoy a stress-free experience, knowing that their project is being managed by a team that owns its own manpower, equipment, and expertise.

AUTHORITY APPROVALS

We act as your expert liaison, ensuring your project meets every municipal, safety, and utility standard in the UAE.
